

**NECKLACE MATERIALS**

- 1 x 53cm length gold Tigertail
- 1 x 55cm length gold Tigertail
- 2 x gold bails to connect pendant to Tigertail
- 2 x gold Charlotte crimps
- 24 x gold 2mm round crimps
- 1 x gold toggle clasp

**BEADS**

- 1 x 28mm Swarovski crystal copper twist pendant
- 4 x 12mm Swarovski 5040 crystal copper donuts
- 2 x 8mm Swarovski light Colorado topaz briolette
- 2 x 6mm Swarovski crystal copper bi-cones
- 2 x 6mm Swarovski light Colorado topaz bi-cones
- 4 x 6mm Swarovski topaz bi-cones
- 10 x gold star daisy metal spacer beads
- 2 x gold cog metal spacer beads
- 2 x 8mm gold metal filigree ball beads
- 2 x 6mm x 10mm gold metal corrugated oval beads

**TOOLS**

- Crimping pliers
- Chain nose pliers
- Wire cutters
- Round nose pliers

Length: 55cm

Divine simplicity, crystal, copper collection.  
Designed by Feathers Nest Creations.

**DESIGN NOTE**

Place the crystal copper AB effect of the crystal so that you are looking down into the rich colours.

**STEP ONE**

Mark centre of both lengths of Tigertail with a felt pen making sure not to bend wire out of shape.

**STEP TWO**

Measure 1.5cm on each side of the centre mark of the 53cm wire adding a folded crimp bead to each side. See Basic Instructions for folding a crimp. Add first cluster of beads on each side as photograph; add folded crimp. Repeat crimping procedure for every following bead cluster.

**STEP THREE**

Leave a 3cm space between the next two clusters of beads and crimp as Step 2.

**STEP FOUR**

Measure 6cm on each side of the centre mark of the 55cm wire, add folded crimp bead to each side. Place bead clusters as photograph add folded crimp as before.

**STEP FIVE**

Measure a 2cm space, place folded crimp and next cluster of beads on each side.

**STEP SIX**

Ensure all lengths of Tigertail and the bead clusters are even on each side by holding the four ends together before going onto the next step. Cut any uneven wire off.

**STEP SEVEN**

Thread two left ends of Tigertail, through a Charlotte crimp, then crimp the two ends of Tigertail together with one round crimp. Bring the Charlotte crimp up close to the round crimp and close the Charlotte crimp jaw over

## EARRINGS MATERIALS

- 2 x 12mm gold filigree bead caps
- 2 x 38mm gold head pins
- 2 x gold ear wires

## BEADS

- 2 x Swarovski crystal copper 5040 donut beads
- 2 x 8mm Swarovski crystal light Colorado topaz bi-cones
- 2 x 6mm Swarovski crystal topaz bi-cones
- 2 x gold cog spacer beads
- 2 x gold star daisy spacer beads

## BRACELET MATERIALS

- 4 x 8mm gold filigree ball beads
- 4 x 6mm x 10mm gold corrugated oval beads
- 5 x 12mm gold filigree bead caps
- 4 x gold star daisy spacer beads
- 37 x 25mm gold head pins
- 1 x gold toggle clasp set
- 17-19mm open link gold chain with approximately 37 links

## BEADS

- 5 x 12mm Swarovski 5040 donuts crystal copper
- 4 x 8mm Swarovski crystal light Colorado topaz
- 4 x 8mm Swarovski crystal topaz bi-cones
- 16 x 6mm Swarovski crystal copper bi-cones
- 8 x 11o Toho topaz seed beads

Length: 20-22cm

the round crimp to hide it. Repeat for the right side of the Tigertail.

## STEP EIGHT

Place the hook of the Charlotte crimp through the toggle end loop, close off the hook. Repeat on the other side to connect the other end of the toggle.

## STEP NINE

Attach crystal copper pendant to both lengths of Tigertail at the centre marks by opening the bail and slipping the wire through.

## EARRINGS STEP ONE

Place in the following order: Bead cap, 12mm donut 5040, cog spacer bead, 8mm bi-cone, star spacer bead, 6mm bi-cone onto the head pin. Repeat for the other head pin.

Using round nose pliers form a loop on each head pin as in Basic Instructions and attach to the ear wires.

## BRACELET DESIGN NOTE

Closed link chain will require two jump rings to attach toggle set.

## STEP ONE

12mm cluster: Insert a head pin through the 12mm bead cap, 12mm donut 5040 bead, 1 x star daisy. Making five x 12mm clusters.

8mm cluster: Insert a head pin through a seed bead, 8mm Briolette bead, star daisy and a seed bead – making four x 8mm clusters.

## STEP TWO

Insert a head pin through all of the remaining 28 beads.

## STEP THREE

Design note: Count the links and, if more than 37, then space the beads/clusters out evenly to compensate for the extra links.

Attaching the clusters and beads to the chain:

Grip head pin at the tip with the round nose pliers and turn it to make a semi-circle. Put the head pin loop through the chain link then continue to turn the head pin in the same direction passing through the chain again until the loop touches the bead firmly. This makes two rings around to secure the beads/clusters in place. Starting at one end of the chain, attach beads/clusters in the following order.

- 12mm cluster
  - 6mm crystal copper bi-cone
  - 8mm gold filigree bead
  - 6mm crystal copper bi-cone
  - 8mm cluster
  - 6mm crystal copper bi-cone
  - 8mm topaz bi-cone
  - Oval gold corrugated bead
  - 6mm crystal copper bi-cone
- Repeat three more times then add one more 12mm cluster (optional) if required.

## STEP FOUR

Attach toggle loop to one end of chain and the toggle bar to the other end.
